ONE TENTH MILE

# BEN ANNIS POND

Hermon Twp., Penobscot Co.  
U.S.G.S. Hermon, Me. (7.5')

## Fishes

White perch  
Yellow perch  
Chain pickerel  
White sucker

Hornpout (bullhead)  
Pumpkinseed sunfish  
Black crappie  
American eel

## Physical Characteristics

Area - 25 acres

Maximum depth - 9 feet

Temperatures:

Surface - 76°F

8 feet - 71°F

Principal fisheries: White perch, chain pickerel, black crappie

Ben Annis Pond contains mostly bog habitat with abundant aquatic vegetation. The pond is shallow with warm water throughout the summer and no habitat to support coldwater fish species. The majority of the fishing pressure occurs during the winter months when access is the easiest. The pond offers an excellent opportunity for families to enjoy winter fishing. The summer angler has the feeling of remoteness while fishing for the scrappy black crappie. Access in the summer to Ben Annis Pond is via small boat or canoe up the outlet stream a short distance from Hermon Pond.

Surveyed - August, 1966
